INSTRUCTIONS

Dear Victor,

Welcome to iNspire.

Over the last month you have been introduced to the world of design and infinite opportunities for implementation via the web. As you seat for your first of three exams, here are some key points to note on how your completed web works will be judged

1) Code Efficiency

At all times try to use the least amount of code to complete the tasks set out within your design plate.

2) Code Readability

Take care to ensure your code is written in a manner that is easy to understand and appreciate. Proper indentation will earn you extra marks.

3) Specification Replication

Ability to reduce difference between designs plates and designs produced will earn you higher scores.

Concering time, You have **5 hours** to complete this exercise. It is expected you will require 1 hour to complete each of the design plates, using the left over two hours to work on bugs and any other arising area of concern.

During assessment, you will have no access to internet resources during the course of completing the tasks within this examination and any attempt to access any helper resources will be classified as cheating, resulting in an automatic expulsion.

You are expected the design plates assembled within this document from scratch following the specifications provided for individulal pages .Including approriate tag within the head area of your .html files including SEO will earn you extra points.

Content Pack

Find within the zip folder, content pack for each page to be developed. Use elements to reconstruct the plate designs featured.

Note: The essence of this test is to understand your current knowledge base in Html 5 and Css3 to enable our trainers chart the best possible path for your journey forward. Endeavour to build the closest possible version of the the plates represented within the designs.

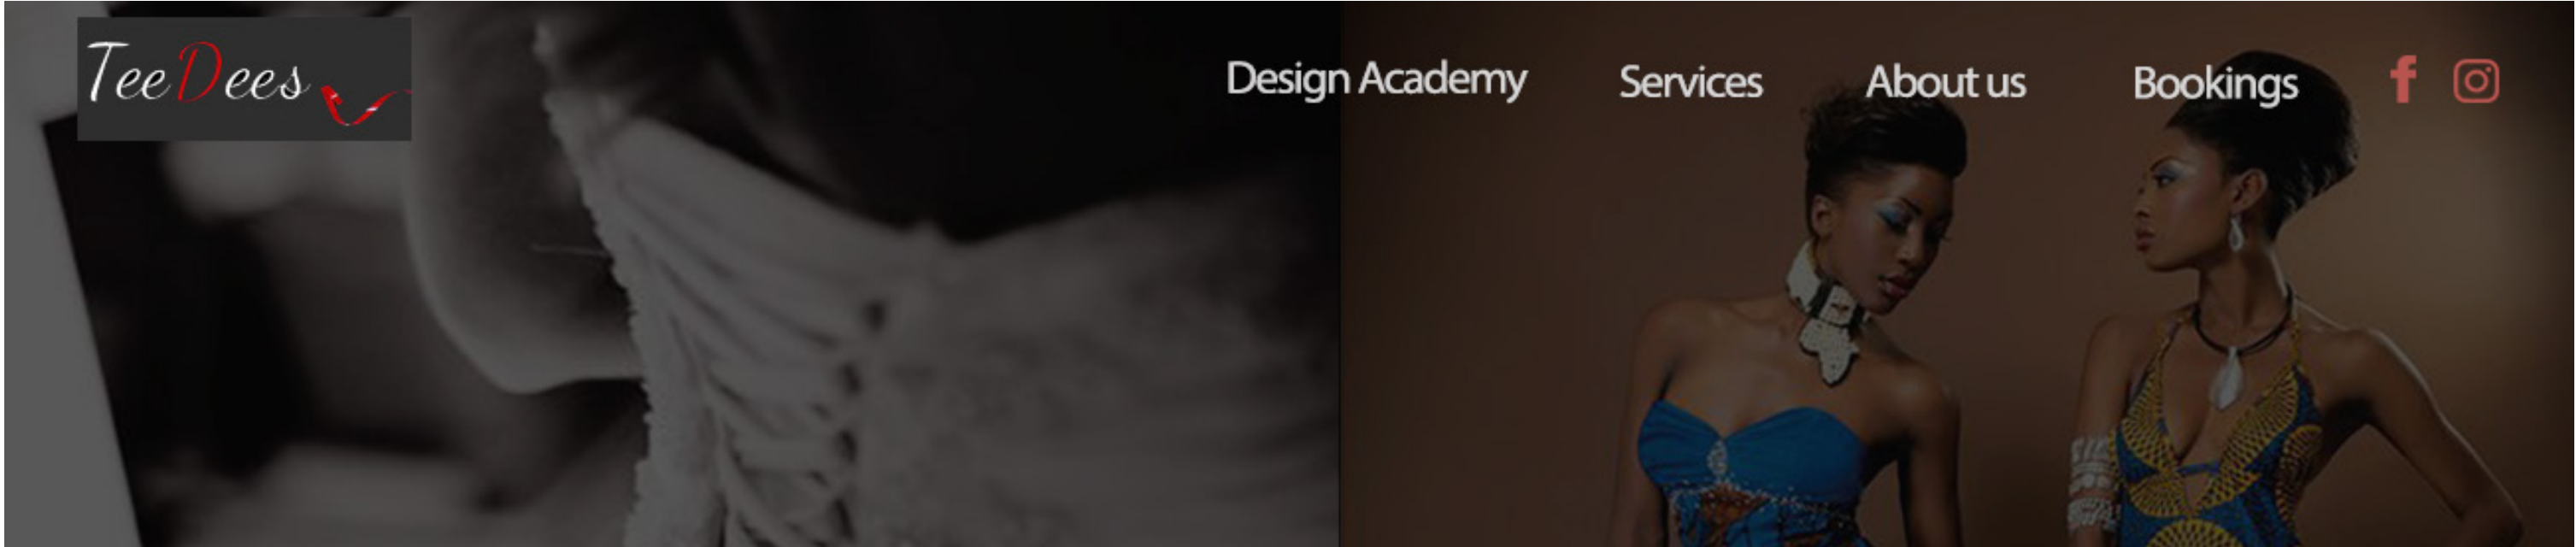

On successful completion of this exercise you will be promoted to the Junior Web Design Intern and begin module 2 of this web training excise where you will learn about grid systems inorder to make your mark upand styling responsive across all channels.

Best of Luck.

Sincere regards,

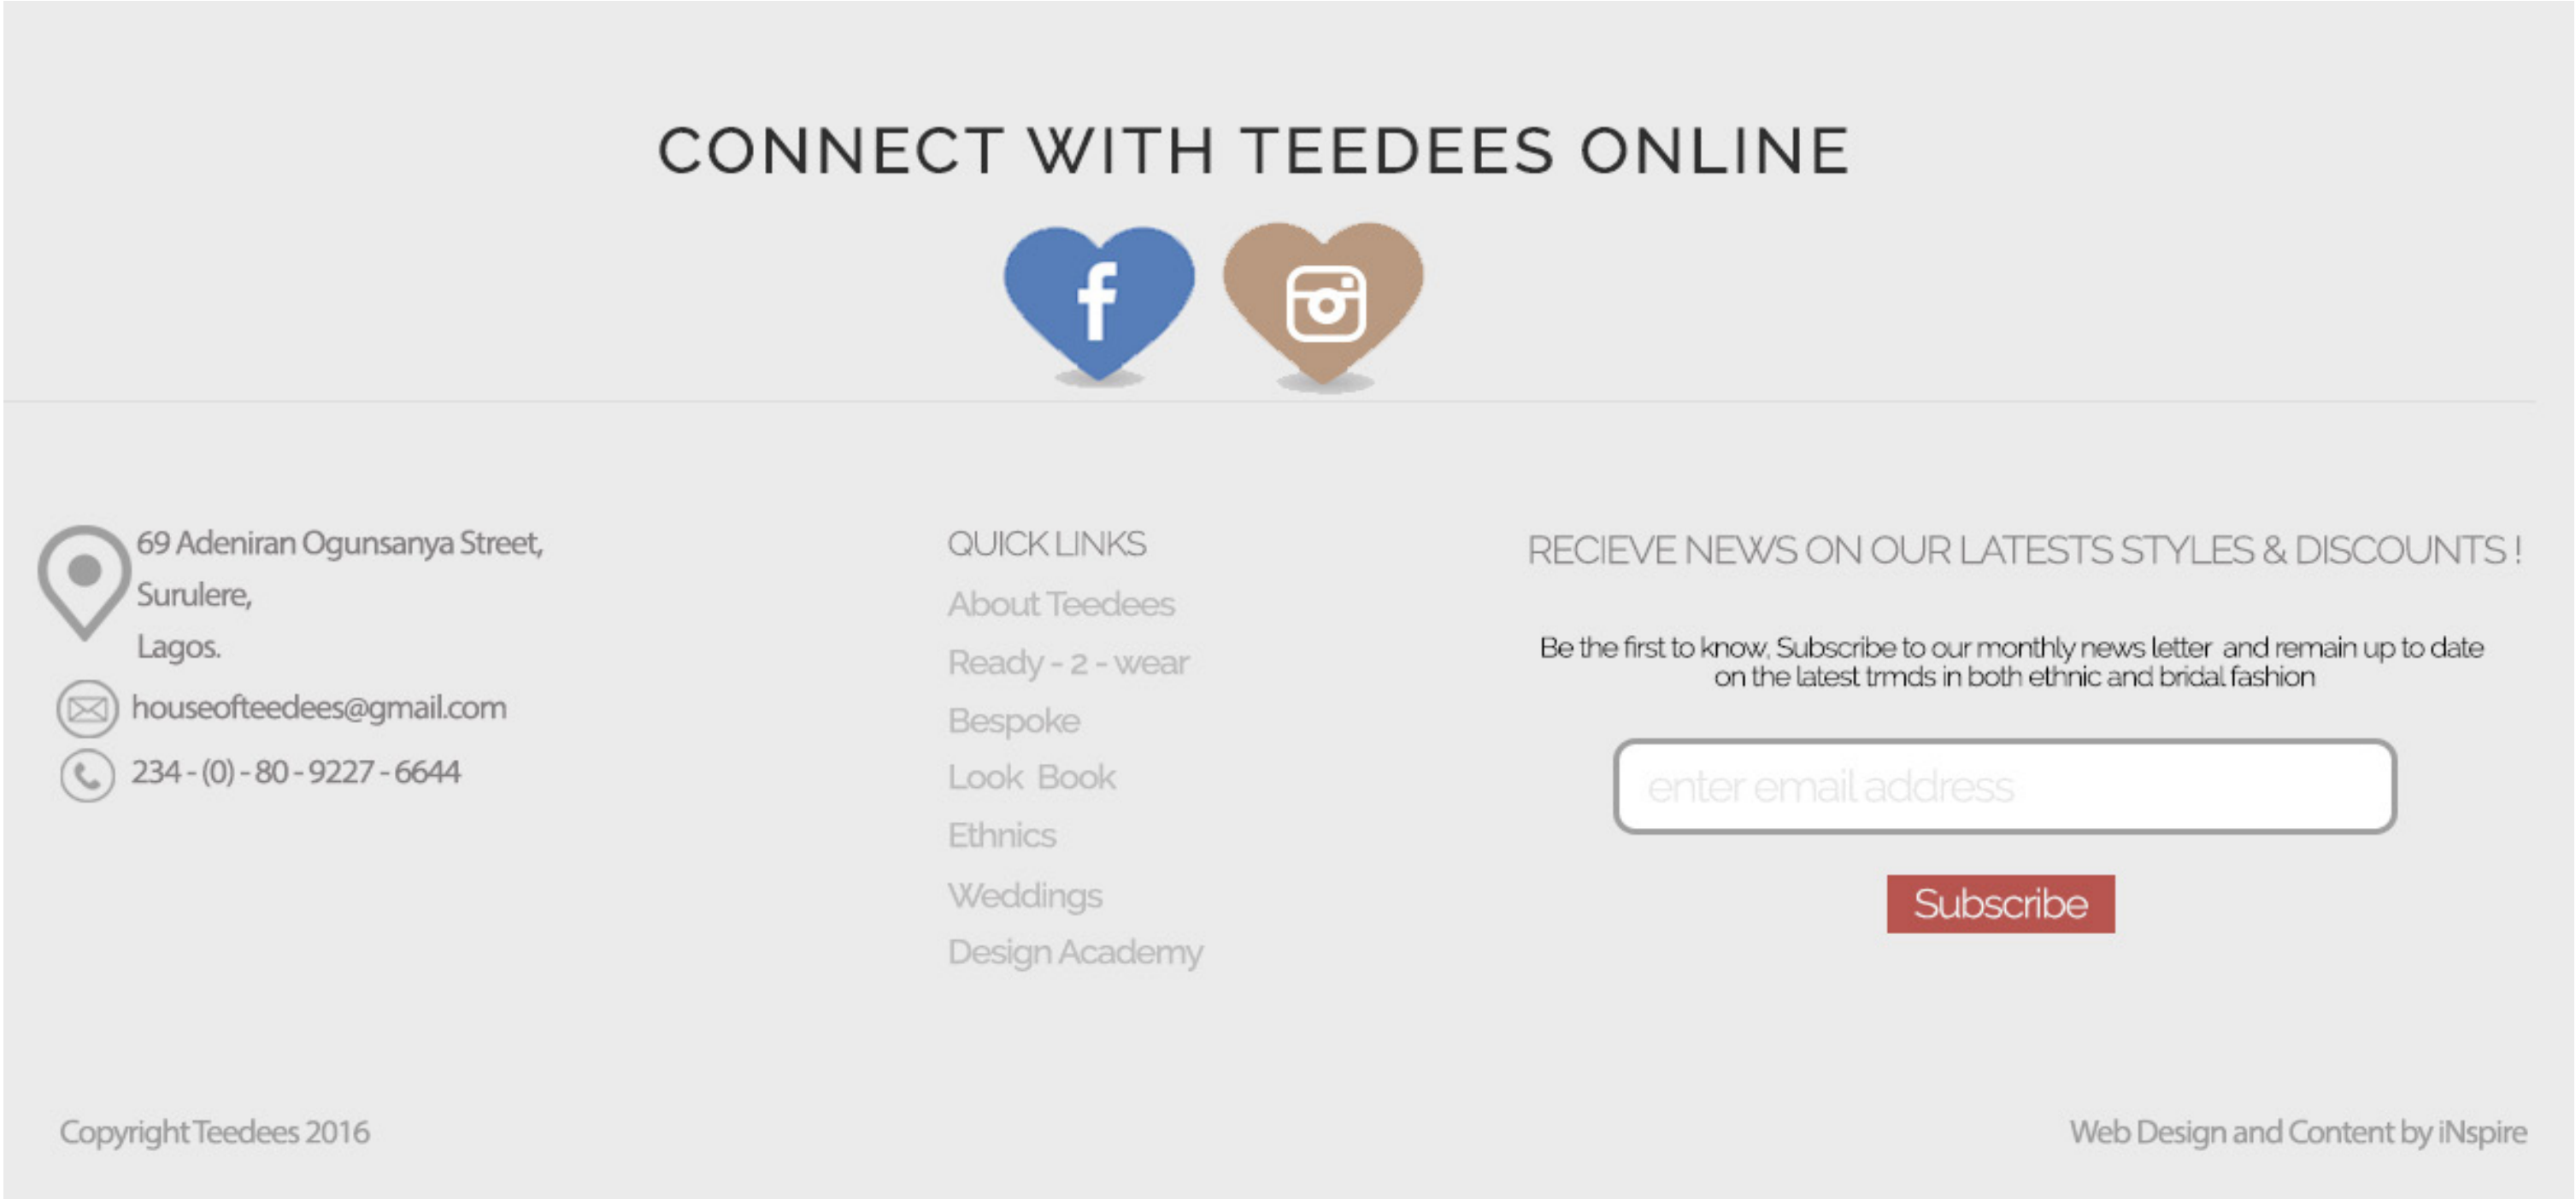

Otaru Andrew Daudu
Technical Coach (Web Design)
